1. STUDENT INFORMATION

Full Name	Lusukama Selestin Selemeni
Student ID/Passport	820701
Student number	20230024
Campus	Cape Town
Placement Period	From 11/08/2026 to _____

2. HOST COMPANY INFORMATION

Company name	NOVATECH DIGITAL
Company address	PRETORIA
Supervisor name	SELEMANI
Supervisor contact	SELEMANI.L@NOVATECH.CO.ZA
Department	IT

STAMP

3. WORK EXPERIENCE MODULE INFORMATION

WM Description	Modelling Processes
WM Code	251201-005-00-WM-02
WM Credits	15
WM NQF	5

3.1 Work Experience Module Duration

Total Hours	OPTION 1- 2 DAYS A WEEK		OPTION 2- 1 DAY A WEEK	Hours per week	Total number of Days
	Tuesday	Thursday	Friday - 08 to 4h00		
150	4 Hours	4 Hours	8 Hours	8	18

3.2 Purpose of the Work Experience Module

The focus of the work experience is on providing the learner with an opportunity to build a logical flow using the framework and methodologies at their disposal to propose possible solutions to business challenges.

3.3 Workplace learning objectives

1. Observe and assist a software engineer with the modelling process and building a logical flow
2. Under supervision, conduct the modelling process and building a logical flow by conducting the following tasks

3.4 Guidelines for Work Experience - 251201-005-00-WM-02

WM-02-WE01: Observe and assist a software engineer with the modelling process and building a logical flow

Scope of Work Experience

The student will be expected to engage in the following work activities:

- Model processes using software applications as specified by the organization
- Apply core business modelling and analysis skills to information software development to implement and maintain a software system that meets organizational requirements
- Increase efficiency and service through construction, maintenance, and streamlining of our computing systems and programs
- Enhance the efficiency and cost-effectiveness of software solutions by designing software programs that are customized to our organization's needs
- Technical specifications and plans are developed based on the analysis of the requirements and consumer feedback
- Technical documentation is developed to guide future software development projects
- Apply core business modelling and analysis skills to model a solution that meets organizational requirements
- Design a wireframe of the proposed amendments, or new solution, and prepare for sign off by client
- Create software design documents

Supporting Evidence

- Logical flow and models

WM-02-WE02: Under supervision, conduct the modelling process and building a logical flow by conducting the following tasks

Scope of Work Experience

The student will be expected to engage in the following work activities:

- Model processes using software applications as specified by the organization
- Apply core business modelling and analysis skills to information software development to implement and maintain a software system that meets organizational requirements
- Increase efficiency and service through construction, maintenance, and streamlining of our computing systems and programs
- Enhance the efficiency and cost-effectiveness of software solutions by designing software programs that are customized to our organization's needs
- Technical specifications and plans are developed based on the analysis of the requirements and consumer feedback
- Technical documentation is developed to guide future software development projects
- Apply core business modelling and analysis skills to model a solution that meets organizational requirements
- Design a wireframe of the proposed amendments, or new solution, and prepare for sign off by client
- Create software design documents

Supporting Evidence

- Logical flow and models

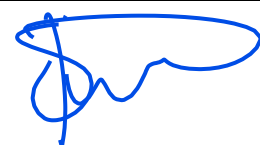

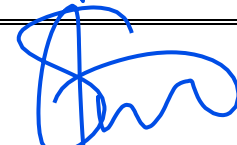

3.5 Additional assignments to be assessed externally

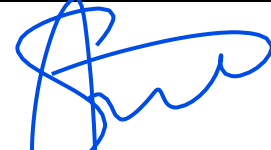

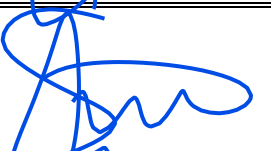

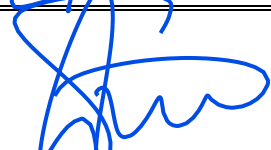

None

4. DAILY LOG

NOTE: Students are required to fill in the daily logbook. The logbook needs to be completed with as much detail possible, to ensure all objectives are met.

Table 4.1 Dailly Log (*Students to complete this section daily*)

Date	Tasks Completed	Skills Applied	Hours Worked	Supervisor Signature
				
				
				
				

5. REFLECTION FORM

(Students to complete this section at the end of the Work Experience Module placement)

- Key lessons learned:

- New skills developed:

- Challenges and how they were overcome:

- Feedback from supervisor:

6. FINAL EVALUATION

(To be completed by the workplace Supervisor)

- Student's Overall Performance:

☐ Excellent
 ☐ Good
 ☒ Satisfactory
 ☐ Needs Improvement

- Strengths Observed:

- Areas for Improvement:

- Comments:

Supervisor Name:

Signature:

Date:

SELEMANI
11/08/2026

7. STUDENT DECLARATION

I, Lusukama confirm that the information recorded in this logbook is accurate and reflects my learning experience.

Student Signature:

Date: 11 / 08 / 2026

CTU Representative

Name and surname: LUSUKAMA - SELESTIN

Signature:  Date: _____

All logbooks must be completed and signed by both the student and the workplace supervisor. Failure to submit a completed logbook may result in delays in the certification process. Ensure all records are accurate and submitted by the required deadline.
